

Product Information Sheet

Premium Interior/Exterior Wall Coating

Ultrashield

One of the most advanced, high performance pure acrylic coatings on the market today, Ultrashield has been amazing even the most experienced painters all over the country with its silky smooth brush-ability and its far superior hiding ability. Ask for a free sample of Ultrashield today to experience this amazing product first hand.

What makes Ultrashield so special? It has been formulated using only the highest quality raw materials for all components including a water based, pure acrylic resin normally only considered for use in roof coatings due its premium price. This no compromise approach has lead to what many experienced painters have called the best paint they have ever used.

Here are some of Ultrashield's many features; silk like brush-ability, superior coverage, self priming on most finished surfaces, dirt pick-up resistant, washable, high scratch and mar resistance and mould resistant.

Available in 4, 10 and 15Lt pails in Low Sheen, Semi-Gloss and Gloss. Tint-able to almost any colour.

Also available; Ceiling White, Undercoat and Sand-able Sealer for use on new, uncoated wall panels.

Specifications:

Self Priming
